

Air One Radio Station is one of the most, if not the only FM radio station that is possitive while bringing the community together with sounds of hope and messages that benefit every one especially young adults. It has great impact on the lives of the masses of people not only Christians but families who feel safe when their kids tune in and listen to Air One. I couldn't imagine not having Air One around if the LPFM broadcaster displaces this possitive sound wave. I can't even start to mention how Air One has changed my life and the lives of my friends and family. Air One not only provides good music but it helps people through out many communities with their walk of faith, it provides hope and love. Radio stations are out there to give you a nice song to hear but Air One goes the extra mile and touches the hearts of many individuals while supporting those who are hungry for clean possitive messages. If you allow the LPFM to come and remove Air One from the sound waves, I believe families and individuals will be greatly effected. Air one is our hope especially for our children, they need and want to hear music, please allow them to listen with safty because Air one delivers that and so much more. Our hope is in Air One, we need Air One, please do not take this life changing radio station away from our communities and families who enjoy possitive music. Please, consider all the people who depend greatly on Air One. The service that Air One provides, is not just another radio station but it is a calling that needs to be supported and appreciated for many years to come.

Thank You
